Application for Acceptance of a Plant Variety into Seed Certification Schemes in Australia

The ASA Conditions for Acceptance of Varieties provide more detail on the information required under each of these headings. A copy of this document is available from the ASA website <https://aseeds.com.au/> and should be examined by anyone intending to apply for the registration of a variety for certification under the OECD Seed Schemes and/or the Australian Seed Certification Scheme.

Date of Application

Proposed Name of Variety

Proposed Name/s of Synonym/s

Species (Botanical name and common name)

Name and Address of Applicant

Name and Address of Breeder

If you are not the breeder, please provide written approval from the breeder to apply for certification of the seed of the variety in Australia under the OECD and/or the Australian Seed Certification Schemes, and to act as the breeder's agent in Australia.

Attached

I am the breeder

This Variety is:

Open pollinated (Cross-pollinated or self-pollinated ie. non hybrid)

Hybrid

Female parent of a hybrid (“A” line)

Male parent of a hybrid (“B” line)

Restorer line (Self pollinated hybrid parent)

Other (Please specify)

If this is a hybrid, name the parental lines.

Has this variety been registered for certification in another country?

No

Yes. If Yes, under what scheme and (s):

OECD Seed Schemes, Country:

AOSCA, Country:

Do you want this variety registered for certification under:

OECD Seed Schemes

Australian Seed Certification Scheme

Is, or will, this variety be protected in Australia under Australian PBR (Please provide documentary evidence if PBR has been granted)

PBR will not be applied for

Is currently protected

PBR has, or will be applied for

Is this variety protected under a PBR scheme in another country

Yes

No

If yes what country (Please provide evidence, including the PBR/PVR registration number)

Will this variety be protected in Australia under a Trademark

Yes

No

If yes, what is the proposed Trademark Please check this with IP Australia. ASA understand that if a variety or synonym is trademarked, ASA can register it for OECD or AUS schemes. However, if a variety or synonym is registered with OECD or AUS scheme, then IP Australia will not register a trademark of the same name. Consult IP Australia or a Trademark/Patent attorney if in doubt.

Origin and breeding history (Provide as an attachment)

Please provide detailed breeding history. This breeding history should also provide evidence of the uniformity of the variety, and its stability under the proposed multiplication regime in Australia.

This Variety is

If the variety is annual, complete **only** question 1 below

If the variety is not an annual, complete **both** questions 1 and 2

1 What Generations will be produced in Australia

Breeders

Pre-Basic. If so, how many generations

Basic

First Generation Certified

Second Generation Certified

If Breeders or Pre-Basic seed will not be produced in Australia, where will it come from? Please attach a written commitment from the source of this seed to provide this seed as required.

2. How many harvests will be allowed from each crop of each generation of seed produced in Australia (only complete this section for varieties that are not annual).

Pre-Basic

Basic

First Generation Certified

Second Generation Certified

Variety Description (Provide as an attachment)

Please provide a detailed morphological description which will enable an experienced field inspector to distinguish this variety, where possible, from other varieties of that species registered in Australia, or of common knowledge in Australia. A description accepted by a National Designated Authority in another country for OECD certification will be acceptable in most cases. The description provided to the Australian PBR Office under Part 2 of the application will be suitable. If PBR is not to be applied for in Australia, a detailed morphological description must still be provided using the UPOV descriptors for that species. A person qualified to produce a description for Part 2 of a PBR description could be commissioned to develop an appropriate description for registration for certification.

Please refer to Appendix 1 of the ASA Technical Standards for the special requirements for hybrid varieties.

Do you propose quality standards for seed purity and germination which are different from those specified for this species in the ASA Technical Standards

Standard conditions

Special conditions Please specify where they differ from the standard conditions

Please specify who will be the Maintainer for this variety This means who will be responsible for maintaining supply of the earliest generation of seed to be grown in Australia, and who is authorised to specify the number of generations and harvests for each generation, and the field purity standards and seed purity and germination standards for this variety. This should be an individual or a position within the applicant's company or organisation.

Who will conduct the post-control tests for this variety

The Maintainer

The designated Certification Agency Please specify

The Maintainer's agent Please specify

Please indicate what agronomic value this variety will offer Australian agriculture

Agronomic merit does not have to be demonstrated, and no trial data is required, but a statement of how and where this variety will provide value to those farmers who grow it is required. Provide as an attachment if space insufficient.

Do you agree that a Standard Sample of this variety will be provided to each Certification Agency who will be requested to certify seed of this variety.

Yes Please consult with the Certification Agency(ies) of your choice for the size of the standard sample required.

No

Details of signatory within the applicant organisation.

Please complete the check list on the following page before submitting

Notes for completion of form

Please complete all sections of this form. To start just click in the first field, and then use the TAB button to move to the next questions/sections, and either click on the appropriate buttons, or fill in the text field. Save and email to the address on the top of the form.

If this is not possible, please print out the blank form fill it out in a strong black pen, so that it can be scanned successfully, and then fax or post to the address on the top of the form

Please complete the following checklist before submitting:

Variety or synonym name is not already listed for similar species with OECD, AOSCA or Australian schemes

If you are not the breeder, a written approval from the breeder to apply for certification of the seed of the variety in Australia under the OECD and/or the Australian Seed Certification Schemes, and to act as the breeder's agent in Australia has been provided

Evidence of PBR registration (if applicable), including the PBR/PVR registration number from Australia or overseas registration

Origin and breeding history

For an annual variety only what generations produced has been provided

For varieties that are not an annual, both generations produced and number of harvests allowed has been provided.
